Atomix Omega is the ultimate survival game. Your goal is to guide a small robot through a maze-like environment while collecting power-ups to unlock the doors and reach the exit. This game is a survival puzzle game with a retro feel. You can run and jump around with the robot, and jump and wall-jump to propel it forward. There are twenty-two puzzles and four levels to complete. In addition to the single-player mode, there is a multi-player mode, which is ideal for training and entertainment when playing with friends. Your robot can collect crystals to unlock doors. There are also puzzles to complete to earn bonus points. The crystals fall from the top of the screen. You can throw red crystals to destroy all the crystals, but you must wait until the topmost crystal has fallen on a floor tile before using the touch screen to throw the next crystal. So to make the robot move around the maze, you must throw all the crystals on the floor. This mode is perfect for those of you who do not enjoy killing or throwing things. You can press the "X" key to activate the robot's throw ability. You can also press the "Z" key to activate wall-jump. For the sake of your robot, you must avoid lava and spikes as you go around the level. You can also press the "A" key to activate on-screen text in order to get tips on how to play the game.
